## Circle

A circle goes round and round,  
An end it has never found.  
It is not a sphere,  
It does not have a rear.  
It has a diameter, circumference and no sides,  
The moon is a circle which brings in the tides.  
Columbus searched like a hound,  
The world is definitely round.  
Not an oval or a square,  
You can find a circle almost anywhere.  
Now this is the end,  
which a circle cannot lend.  
Now I must go, for which you know,  
So, I hope you enjoyed the show!

Anna Palco

## Multiplication

Oh, how I love to multiply,  
Without multiplication, I think I'd die.  
All my friends think I'm obsessed,  
But they're not the one getting A's on their tests.  
Through every problem, my knowledge expands,  
I study to keep up with all its demands.  
I practice so much, there's no time to play.  
But that's fine with me, yes, it's quite all right,  
Multiplication's so fun, never wrong, always right.

Molly Hager

## Equations

Equation  
a number  
with a letter in its place  
it is the letter you must replace.  
There are plenty of ways  
to find your answer  
but all of it just depends  
on what the problem is,  
whose question you want to end.  
I like to solve equations  
because they're really no problem at all.  
They're quick  
and easy  
and really cool  
and soon become lots of fun.  
And even though  
they're algebraic  
and at introduction they sound hard,  
there's really nothing to them,  
nothing really at all.

Benjamin Davidson
